

AT2

**MWD Automation
augmented
with the expert
knowledge.**

What we offer

Just assemble your BHA and our platform will take care of everything else:

1. Provide the surface unit and log processing package to a customer **for free**;
2. Dedicate **a remote MWD** engineer for the jobs;
3. Constantly monitor entire workflow AI + human;
4. Advise during the job;
5. **Manage all the deliverables** (including survey reports, logs, EORs, EOWs);

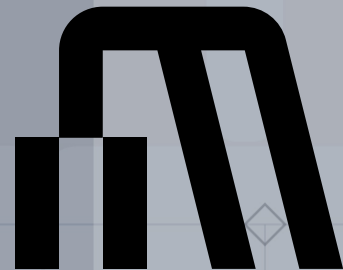

Benefits:

1. **Price:** rates significantly lower than market average;
2. **Free trial:** first job is free;
3. **Free surface equipment that works:** zero software licence and support fees;
4. **Data Quality Control:** transparent metrics for decoding, surveys, log quality;

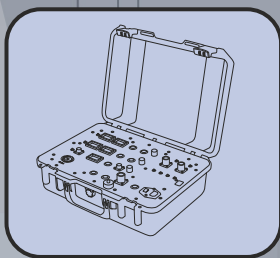

Who we are?

A spin-off of the full cycle MWD technology company

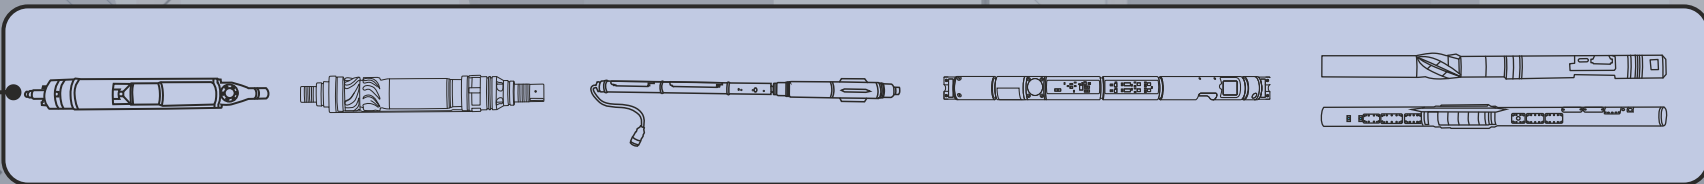

Surface unit

Software

MWD System

Data compression up to 5 times
Data transfer speed up to 4 b/s
Noise-resistant protocol

Technologies

Not just a team viewer but a cutting-edge software automation for MWD data processing.

Signal toolkit:

- Automatic filters adjustment through cloud.
- AI enhanced digital signal processing.
- Reprocessing of historical data realtime.
- Manual Decoding toolkit.
- Read signal from decoder memory.
- Multiplatform support 10+ MWD systems supported.

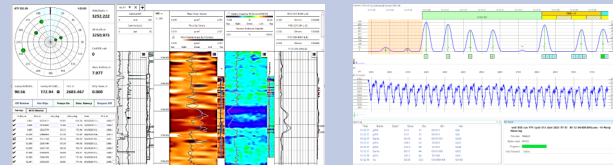

Deliverables and reporting:

- Logs, Surveys, Performance reports – in various formats.
- Survey Corrections, Basics and MSA.
- Multiple WITS, WITSML outputs.

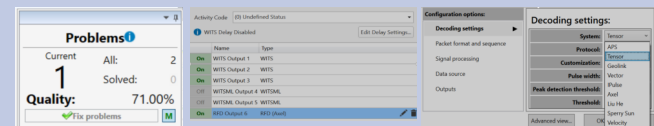

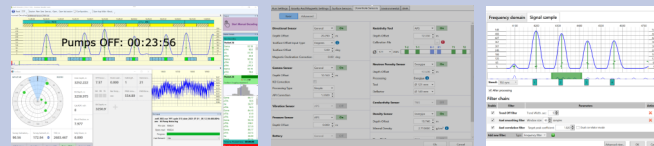

Remote monitoring and control:

- Comprehensive multi-rig monitoring.
- Simplified Rig communication control.
